Visitors Welcome

*A special thank you to everyone who purchased
cattle from us this past year!*

Welcome to our 36th Annual Production Sale. Thyen Farms will again be a guest consignor.

Looking back, 2018 was a very challenging year. The weekend of the third and fourth of March we got hit with a very hard snowstorm, the seventh was our sale; we got into calving and endured one storm after another. The mid April storm for a lot of ranchers was a huge disaster. It wore people out, old and young. It was tough on the cattle. It wore the cows down, so our calves on the average were down forty to fifty pounds at weaning, but they looked good.

Our cows were off a body score from normal conditions. We went from a late winter to summer then right back to winter. Day after day of smoke filled skies, from Western forest fires, we believe had an effect on grass and feed quality, plus additional stress on livestock and people.

We weaned the 15th of October a week later than normal due to wet yards. We haven't had any sick calves and didn't even feed crumbles. The Simmental and Angus bulls here received the same standard vaccination program and our Simmental bulls will receive a Foot Rot vaccination and a magnet for preventive hardware. We will give a Foot Rot booster shot when we do a fertility check in April. We can keep our Simmental bulls free of charge until the first of May, then I will deliver them free of charge up to 250 miles.

We welcome everyone to view the bulls prior to the sale at the ranch and watch our bulls on the video on our web page www.schmigsimmentalranch.com

Sincerely,

Dennis and Joanne Schmig

A QUICK REFERENCE TO AN EXPLANATION OF EPDs:

Expected Progeny Differences (EPDs) are the most accurate and effective tool available for comparing genetic levels. In using EPDs the differences between two sires EPDs represents the unit difference expected in the performance of their progeny. (Listed below are the units ASA EPDs are expressed in:)

Calving Ease (CE): Percent of unassisted births when used on heifers

Birth Weight (BW): Pounds of birth weight

Weaning Weight (WW): Pounds of weaning weight

Yearling Weight (YW): Pounds of yearling weight

Maternal Calving Ease (MCE): Percent of unassisted births in first-calving daughters

Maternal Milk (MM): Pounds of weaning weight due to milk

Maternal Weaning Weight (MWW): Pounds of weaning weight due to milk and growth

Stayability (Stay): Percent of daughters remaining in the cow herd at six years of age

Docility Score (DOC): The higher the number, the better the score

Carcass Weight (CW): Pounds of carcass weight

Yield Grade (YG): Yield Grade Score

Yield grade is an indication of the yield of red meat within a carcass. It is calculated by using several factors including: 1) fat thickness; 2) kidney, pelvic and heart fat; 3) hot carcass weight; 4) rib-eye area. A (-) EPD is better.

Marbling (MRB): Marbling score

Indexes: The last two columns in the EPD section are fairly new to the Simmental Breed, but interesting, they are \$ indexes. Though EPDs allow for the comparison of genetic levels for many economically important traits, they only provide a piece of the economic puzzle. That's where \$ indexes blend EPDs and economics to estimate an animal's overall impact on your bottom line.

All Purpose Index (API): It's exactly what it says, all purpose, this index includes every trait that can be calculated, calving ease, pounds at weaning and yearling, keeping replacements back, milking ability and stayability, then the calf crop. It took into consideration some being retained as replacements, then the rest being fed out and sold grade and yield.

Terminal Index (TI): This index is to be used if all calves are going to a feedlot. It evaluates a sire for use only on mature cows with all calves put on feed and sold grade and yield. No other factors were figured in.

Using API and TI, first determine which index to use, if you're breeding heifers and keeping replacements, use API, if all calves are going to the feedlot and finished, then use TI.

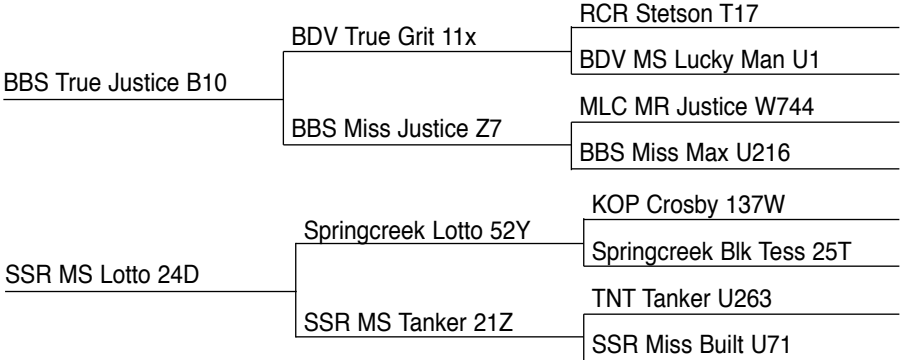

BULLS

F3

SSR MR JUSTICE F3 ASA NO.: 3463685
 BIRTH DATE: March 15, 2018 BIRTH WT.: 82 lbs.

PUREBRED BULL

BLACK POLLED
 205 DAY WT.: 786 lbs.

Should sire above average growth with very strong maternal traits and nice disposition. First calf by his dam.

Thyen Farms

Waverly, SD 57201

*Where Friends are Welcome and
Strangers Leave as Friends*

Welcome to Thyen Farms

Welcome to our part of the catalog and preview of our sale bulls. It's been a cold and tough winter on humans and animals. I can safely say for all of us this winter has been long enough!! We all remember last spring and having the weather from last April, but let's look to the future, because that's where you'll spend the rest of your life.

Our bulls are coming along real nice and developing into a great herd of sires, many are bred for calving ease for your heifer programs. We have new sires with different blood lines to use in your herds but also the heifers at home to become new bull mothers for the future.

After the sale the bulls will go back home and we'll get them ready for your pasture this summer. We'll have them semen tested and delivered free up to 250 miles when you need them. If you have any questions or would like to see the bulls before the sale please call Dan 605-520-5120 or Nathan 605-881-0693.

Thank you,

Dan Thyen
